

Hostile Vehicle Mitigation Barrier BLAX V2

The BLAX V2 – 3.5T model is certified to resist cars and trucks up to 3.5 tons at 50 km/h.

PRODUCT OVERVIEW

Protecting public spaces from vehicular threats is crucial, especially during hallmark events like Remembrance Days, national festivals, and New Year's Eve celebrations. RPM Hire's temporary Hostile Vehicle Mitigation (HVM) mobile barrier is the ideal solution, offering robust protection for both recurrent and ad-hoc cultural and sporting events.

This versatile barrier is designed for rapid deployment and removal, ensuring city streets can swiftly return to normalcy post-event. Its no-ground-anchoring feature prevents damage to roadways, and the modular design allows for adjustable lengths to suit various scenarios.

VEHICLE MITIGATION BARRIER BLAX V2

Constructed from hot-dip galvanised welded blocks connected by tubes with no visible elements, the barrier boasts durability and weather resistance.

The assembly is secure and tamper-proof, requiring special tools for disassembly, while its low connecting elements ensure pedestrian-friendliness. Each unit includes a storage rack for easy transport and storage, is manufactured in France to rigorous standards, and features night-time visibility with four reflectors per block.

CERTIFIED

KEY FEATURES & BENEFITS

- **No Ground Anchoring:** Installation does not require anchoring to the ground, avoiding any potential damage to the roadway.
- **Modular Design:** The barrier's length is adjustable by adding or removing elements, providing flexibility for different scenarios.
- **Robust Construction:** Made of hot-dip galvanised welded blocks, connected by tubes with no visible connecting elements, ensuring durability and resistance to weathering.
- **Secure Assembly:** The assemblies are designed to be tamper-proof, requiring special tools (two locking spanners included) for disassembly.
- **Pedestrian Friendly:** Low connecting elements allow pedestrian passage during crowd movements.
- **Delivered with Storage Rack:** The barrier comes with a dedicated storage rack for easy transportation and storage.
- **Rigorous Standards:** Manufactured in France, adhering to stringent quality and safety standards.
- **Night-time Visibility :** Each block is equipped with 4 reflectors for a good visibility at night.

SPECIFICATIONS

Dimensions of the assembled barrier:	
Space between elements (step)	640 mm
Length for 7 elements (standard)	4 Meters
Weight for a 4 meters length	250 Kgs

Block's dimensions	
Height	772 mm
Width	1100 mm
Thickness	120 mm
Weight	25 Kgs a block

Dimensions of the storage rack:	
Length	1150 mm
Width	1150 mm
Height	1100 mm
Weight of the rack loaded with a complete 4 meters barrier (7 blocks):	280 Kgs
